

Product

Road Plate is a modular system with individual units linked together. There's no need for expensive specialist lifting equipment as the road plate weighs only 42kg and can be installed in minutes with a two man lift. No crane needed.

The anti-slip surface provides secure pedestrian access and the innovative flexible edge dampens any unwanted sounds. Road Plate is ideal in residential areas.

Features

- Modular Composite Road Plate System.
- Tested to a vehicle weight of 44tonnes over a 700mm trench.
- Easy two man lift.
